NIKK activity plan ATHENA dissemination year 2009-2010

NIKK is a transnational resource- and information centre on gender research and gender equality in the Nordic countries, working to constitute a bridge between Nordic gender research and equality politics. NIKK initiates, co-ordinates, and executes projects that focus on central gender equality issues, i.e. research and development, statements, surveys, and reports.

NIKK will continue to inform about ATHENA and ATHENA publications via our website www.nikk.no, our newsletter and in our Nordic network.

NIKK will take part in meetings, workshops and conferences organized by ATHENA or ATHENA working groups during the dissemination year.

NIKK participates in the European research project Gendered Citizenship in Multicultural Europe: The Impact of Contemporary Women's Movements (FEMCIT). FEMCIT is funded by the European Commission's 6th framework programme and constitutes 15 partners from 10 European countries. By the year 2010 NIKK will engage in the dissemination of the research results following the project.
